PROFESSIONAL SUMMARY

Software developer and third-year Computer Science student with 2+ years of web development experience, delivering commercial products from client discovery and Figma design to implementation and deployment. Independently implemented Microsoft 365 and built internal business applications in my IT role. Strong problem-solving, systems thinking and end-to-end ownership; expanding into Node.js, PostgreSQL and full-stack engineering. Open to relocation.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, responsive design, accessibility
Backend & data: Node.js (learning), PostgreSQL (learning), REST API integration, Next.js Server Actions, Zod
Product & delivery: Figma, requirements analysis, UI/UX design, React Hook Form, Resend, SEO, Git, GitHub, Vercel
IT & infrastructure: Microsoft 365, SharePoint, Microsoft Lists, WordPress, Active Directory, Windows Server, NAS hosting, troubleshooting

PROFESSIONAL EXPERIENCE

IT Specialist — Zarząd Budynków Mieszkalnych, Koszalin | Apr 2025 – Present

- Independently rolled out Microsoft 365 across the organization, supporting cloud services, account administration and day-to-day adoption.
- Designed and built a maintenance-request workflow with role-based access and tailored views using SharePoint and Microsoft Lists to organize internal work.
- Developed a WordPress-based municipal building records application with filtering, pagination, inspections and document management; deployed it on a NAS for internal network access. Also administer Windows Server, Active Directory and IT infrastructure.

Freelance Web Developer | Commercial projects

- Independently lead client discovery, analyze existing workflows and requirements, and turn business problems into functional specifications and Figma designs.
- Design, build, deploy and maintain production websites; advise clients on UX, responsive design, accessibility, SEO and technical trade-offs.

SELECTED PROJECTS

Hoodmood Dance Studio — Commercial web platform | Next.js, TypeScript, React Hook Form, Zod, Resend, Figma

- Owned the complete delivery of a multi-location dance studio platform, from stakeholder interviews and Figma mockups to deployment and maintenance.
- Built a four-step enrollment system with conditional inputs, client/server-side Zod validation, verified class selection, pricing logic and automated Resend emails.
- Centralized schedule and instructor data; client reported fewer routine phone inquiries and increased registrations after launch.

iWallDesign — Commercial client website | UI/UX design, frontend development

- Delivered a commercial website through direct client collaboration, iterative UI/UX design, responsive development and deployment.

OpsDesk — Internal management system (in development) | Next.js, TypeScript, PostgreSQL (planned)

- Designing a business application around ticket management, role-based workflows and IT asset tracking; focusing on data modeling and system architecture.

RAWG Copy — Game discovery application | React, REST API

- Developed search and browsing experiences with API-driven content, autocomplete, infinite scroll, dynamic filters and detailed game views.

EDUCATION

B.Eng. in Computer Science — Koszalin University of Technology | 2024 – Present | Third-year student
Languages: Polish (native), English (B2)
